Summary

I've been in contact with programming since 2015 and since 2019 I've been working with it. I have experience with web applications, small and big software, object-oriented programming, creating and consuming REST APIs, high-performance applications and multi-threaded systems.

- Knowledge in React.js, Next.js, Tailwind.css, Typescript, Node.js and PostgreSQL;
- Work experience in back-end development(PHP, Laravel, Python, Delphi), front-end development(Javascript, AngularJS), relational databases(MySQL, Oracle), git(GitHub, GitLab), agile methodologies(Scrum, Kanban);

Experience

Nelogica – Back-end Developer

Junho de 2021 – Junho de 2023 / Porto Alegre, Rio Grande do Sul, Brazil.

- Coded with Delphi and Python, versioning on GitLab, in two different teams, "Homebroker" and "Project", maintaining and improving our services.
- In the homebroker team I created specific solutions for brokers, requiring constant alignment with our customers. I also did refactoring in order to optimize and standardize the brokers code.
- In the project team I developed solutions that improved the product as a whole, for that I worked with developers from other areas such as database and front end.

isDesign Softwares – Full-Stack Developer

Janeiro de 2020 – Maio de 2021 / Feliz, Rio Grande do Sul, Brazil.

- Coded with PHP, Javascript, AngularJS and MySQL, versioning on GitHub.
- I worked on the systems of most of our customers, from the smallest to the largest, mainly developing new features and fixing bugs.
- I taught Git and Github to my co-workers to start using them in our projects

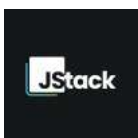

Webermaq – Full-Stack Developer

February 2019 – December 2019 / São Sebastião do Caí, Rio Grande do Sul, Brazil.

- Coded with Laravel, Javascript and MySQL, versioning on GitHub.
- Worked on the development of essential functionalities such as order and product management and integration with the e-commerces and post office systems.
